GRADUATE SCHOOLRONALD BAMFORD, Ph.D., *Dean*LUCY A. LYNHAM, B.A., *Secretary to the Dean***HISTORY AND ORGANIZATION**

THE Graduate School was established in its present form in 1918 under the jurisdiction of the Graduate Council with the Dean of the Graduate School serving as chairman. It was created for the purpose of administering and developing programs of advanced study and research for graduate students in all branches of the university. Prior to the present organization some advanced degrees were awarded but they were under the jurisdiction of the individual departments subject to the supervision of the general faculty. Despite the large expansion of the graduate programs into new areas as the university has grown, the spirit and basis of each program is essentially that of individual study under competent supervision. At the present time over fifty departments are authorized to offer graduate programs leading to one or more of the advanced degrees awarded by the university.

The Graduate Council is made up of representatives of all branches of the university where active graduate programs are in progress. The members are appointed by the President of the University and are charged with the formulation of overall policies. The Graduate Council meets regularly in March, June and November to consider all matters relating to graduate work brought to its attention by the University Administration, the Graduate Faculty and the Dean of the Graduate School. It may also be called for special meetings throughout the year if urgent business must be transacted.

The Graduate Faculty is made up of those members of the faculties of the various colleges who give instruction in approved graduate courses. The direction of individual programs and theses is primarily assigned to senior members of the departmental staffs.

LOCATION

The office of the Graduate School is located on the second floor of the Education Building on the College Park campus. This campus is located in Prince Georges County on a large tract of rolling wooded land less than eight miles from Washington, D. C. and approximately thirty-two miles from Baltimore. It is served by excellent transportation regardless of whether private car, street car, railroad or bus is used.

The Baltimore campus of the university is located at the corner of Lombard and Greene Streets, and on this campus the various departments in the Schools of Medicine, Dentistry and Pharmacy offer their graduate programs.

LIBRARIES

The libraries of the university are located on both the College Park and Baltimore campuses. They consist of the General Library, the Library Annex

and the many college and departmental libraries which house special collections. Because of the location of the university the large libraries of Baltimore and Washington are a valuable asset to graduate work. Arrangements can be made for personal work in the Enoch Pratt Library of Baltimore, the Library of Congress, the United States Department of Agriculture Library and the many fine collections of other government agencies in Washington.

MISCELLANEOUS INFORMATION

For information in reference to the University grounds, buildings, equipment, transcripts of records, off-campus housing, meals, athletics and recreation, religious denominational clubs, fraternities, sororities, societies and special clubs, student publications, University supply store, write to the Director of Publications for the General Information Issue of the Catalog.

GENERAL REGULATIONS

ADMISSION

An applicant for admission to the Graduate School must hold a Bachelor's or a Master's degree from a college or university of recognized standing. The applicant shall furnish an official transcript of his collegiate record which for unconditional admission must show creditable completion of an adequate amount of undergraduate preparation for graduate work in his chosen field. Application for admission to the Graduate School should be made prior to dates of registration on blanks obtained from the office of the Dean.

After approval of the application a matriculation card, signed by the Dean, is issued to the student. This card permits one to register in the Graduate School. It is his certificate of membership in the Graduate School and should be retained by the student to present at each succeeding registration.

Admission to the Graduate School does not necessarily imply admission to candidacy for an advanced degree.

REGISTRATION

All students pursuing graduate work in the University, even though they are not candidates for higher degrees, are required to register in the Graduate School at the beginning of each session. *In no case will graduate credit be given unless the student matriculates and registers in the Graduate School.* This applies especially to those students who register through the College of Special and Continuation Studies at locations away from the campus.

The program of work for each session is arranged by the student with the major department and entered upon two course cards, which are signed first by the professor in charge of the student's major subject and then by the Dean of the Graduate School. One card is retained by the Dean. The student takes the other card, and in case of a new student, also the matriculation card, to the Registrar's office, where the registration is completed. Students will not be admitted to graduate

courses until the Registrar has certified to the instructor that registration has been completed. Course cards may be obtained at the Registrar's office or at the Dean's office. The heads of departments usually keep a supply of these cards in their respective offices.

A time schedule, supplementing this catalog, is issued shortly before the beginning of each semester, showing the hours and location of class meetings. This schedule is available at the office of the Registrar.

GRADUATE COURSES

Graduate students must elect for credit in partial fulfillment of the requirements for higher degrees only courses designated *For Graduates* or *For Graduates and Advanced Graduates*. Students who are inadequately prepared for graduate work in their chosen fields or who lack prerequisites for minor courses may elect a limited number of courses numbered from 1 to 99 in the general catalogue, but graduate credit will not be allowed for these courses. Courses that are audited are registered for in the same way as other courses, and the fees are the same.

PROGRAM OF WORK

The professor who is selected to direct a student's thesis work is the student's adviser in the formulation of a graduate program, including suitable minor work, which is arranged in cooperation with the instructors. To encourage thoroughness in scholarship through intensive application, graduate students in the regular sessions are limited to a program of fifteen credit hours per semester. If a student is preparing a theses during the minimum residence for the master's degree, the registration in graduate courses should not exceed twelve hours for the semester.

SUMMER SESSION

The University conducts a six-weeks summer session at College Park, with a comprehensive undergraduate and graduate program. The University publishes a separate bulletin giving full information on this summer session. This bulletin is available upon application to the Director of the Summer Session, University of Maryland, College Park.

GRADUATE WORK IN PROFESSIONAL SCHOOLS AT BALTIMORE

Graduate courses and opportunities for research are offered in the professional schools at Baltimore. Students pursuing graduate work in the professional schools must register in the Graduate School, and meet the same requirements and proceed in the same way, as do graduate students in other departments of the University.

OAK RIDGE INSTITUTE

The University is one of the sponsoring institutions of the Oak Ridge Institute of Nuclear Studies located at Oak Ridge, Tennessee. One of the features of this affiliation is the opportunity, in the appropriate fields, for graduate students to do

their research problems and prepare their theses under a cooperative arrangement. Such opportunity is limited to those who have completed their course work on the campus, are working in a field where facilities are available, and generally are candidates for the doctoral degree. Successful applicants will receive Oak Ridge Graduate Fellowships with varying stipends depending upon their marital status and dependents. Detailed information is available in the Graduate School office.

GRADUATE WORK BY SENIORS IN THIS UNIVERSITY

A senior of this University who has nearly completed the requirements for the graduate degree may, with the approval of his undergraduate dean, the Head of the department concerned, and the Dean of the Graduate School, register in the undergraduate college for graduate courses, which may later be transferred for graduate credit toward an advanced degree at this University, but the student must be within seven credit hours of completing his undergraduate work and the total of undergraduate and graduate courses must not exceed fifteen credits for the semester. Excess credits in the senior year cannot later be used for graduate credit unless such pre-arrangement is made. Seniors who wish to register for graduate credit should apply to the Dean of the Graduate School for information about procedure.

ADMISSION TO CANDIDACY FOR ADVANCED DEGREES

Application for admission to candidacy for the Master's and for the Doctor's degree is made on application blanks which are obtained at the office of the Dean of the Graduate School. These are filled out in duplicate by the student and submitted to his major department for further action and transmission to the Dean of the Graduate School. All applications for admission to candidacy must be approved by the Graduate Council.

Admission to candidacy in no case assures the student of a degree, but merely signifies he has met all the formal requirements and is considered by his instructors sufficiently prepared and able to pursue such graduate study and research as are demanded by the requirements of the degree sought. The candidate must show superior scholarship in graduate work already completed.

Application for admission to candidacy is made at the time stated in the sections dealing with the requirements for the degree sought.

REQUIREMENTS FOR THE DEGREES OF MASTER OF ARTS AND MASTER OF SCIENCE

Advancement to Candidacy. Each prospective candidate for the Master's degree is required to make application for admission to candidacy not later than the date on the calendar for the semester in which the degree is sought. He must have completed at least twelve semester hours of graduate work at the University of Maryland. An average grade of "B" in all major and minor subjects is the minimum requirement.

Minimum Residence. A residence of at least two semesters, or equivalent, at this institution, is required.

Course Requirements. A minimum of twenty-four semester hours, exclusive of thesis and registration for research, with a minimum average grade of "B" in courses approved for graduate credit, is required for the degrees of Master of Arts and Master of Science. The student is also required to register for six semester hours for research and thesis work. The total number of credit hours required for the degree is thirty. If the student is inadequately prepared for the required graduate courses, either in the major or minor subjects, additional courses may be required to supplement the undergraduate work. Of the twenty-four hours required in graduate courses, not less than twelve hours and not more than sixteen semester hours must be earned in the major subject. The remaining credits must be outside the major subject and must comprise a group of coherent courses intended to supplement and support the major work. Not less than one-half of the total required course credits for the degree, or a minimum of twelve, must be selected from courses numbered 200 or above. No credit for the degree of Master of Arts or Master of Science may be obtained for correspondence courses or those taken by examination. The entire course of study must constitute a unified program approved by the student's major adviser and by the Dean of the Graduate School.

Transfer of Credit. Credit not to exceed six semester hours, obtained at other recognized institutions, may be transferred and applied to the course requirements of the Master's degree, provided that the work was of graduate character, and provided that it is approved for inclusion in the student's graduate program at the University of Maryland. This transfer of credit is submitted to the Graduate Council for approval when the student applies for admission to candidacy for the degree. Acceptance of the transferred credits does not reduce the minimum residence requirement. The candidate is subject to final examination by this institution in all work offered for the degree.

Thesis. In addition to the twenty-four semester hours in graduate courses, a satisfactory thesis is required of all candidates for the degrees of Master of Arts and Master of Science. (Exceptions may be made in the cases of candidates for the degree of Master of Arts in American Civilization. See page 673.) The thesis must demonstrate the student's ability to do independent work and it must be acceptable in literary style and composition. With the approval of the student's major professor and the Dean of the Graduate School, the thesis in certain cases may be prepared *in absentia* under direction and supervision of a member of the faculty of this institution.

The original copy of the thesis must be deposited in the office of the Graduate School not later than the date specified in the calendar in the front of this catalog. The date published is the deadline for the acceptance of theses but they may be deposited earlier. The thesis should not be bound by the student, as the University later binds all theses uniformly. An abstract of the contents of the thesis, 200 to 500 words in length, must accompany it. A manual giving full directions for the physical make-up of the thesis is in the

hands of each professor who directs thesis work, and should be consulted by the student before the typing of the manuscript is begun. Individual copies of this manual may be obtained by the student from the Student's Supply Store at nominal cost.

Final Examination. The final oral examination is conducted by a committee appointed by the Dean of the Graduate School. The student's adviser acts as the chairman of the committee. The other members of the committee are persons under whom the student has taken most of his major and minor courses. The chairman and the candidate are notified of the personnel of the examining committee at least one week prior to the period set for oral examinations unless an emergency arises. The chairman of the committee selects the exact time and place for the examination and notifies the other members of the committee and the candidate. The examination should normally be conducted at the end of the semester, but upon recommendation of the student's adviser, an examining committee may be appointed by the Dean of the Graduate School at any time when all other requirements for the degree have been completed. A report of the committee is sent to the Dean as soon as possible after the examination. A special form for this purpose is supplied to the chairman of the committee and the approved must be unanimous. Such report is the basis upon which recommendation is made to the faculty that the candidate be granted the degree sought. The period for the oral examination is usually about one hour, but the time should be long enough to insure an adequate examination.

The examining committee also approves the thesis, and it is the candidate's obligation to see that each member of the committee has ample opportunity to examine a copy of the thesis prior to the date of the examination.

A student will not be admitted to final examination until all other requirements for the degree have been met. In addition to the oral examination a comprehensive written examination may be required at the option of the major department.

REQUIREMENTS FOR THE DEGREES IN AMERICAN CIVILIZATION

Studies in the American Civilization program are intended to prepare the candidate for teaching and research in American culture. The program is particularly designed for the teacher or student whose intellectual interest is not limited to a single academic department. For instance, the historian who likes literature, the literary critic who wishes to study the social background of literature, the political scientist who wishes to know more about the history of this country, and the sociologist who wants to study the roots of sociology in America, all may find the American Civilization program the proper one for them. The four cooperating departments of English, History, Government and Politics, and Sociology offer the basic work in the program, and the student will stress the work of one of those departments when he determines his course of graduate studies. All students, however, will be expected to understand the

development of American institutions and to show some proficiency in the literary, social, economic, and political history of the United States.

The study of American Civilization brings in many different fields, so a student has an unusually wide opportunity to plan a program suited to his individual needs. To help him do this, a committee representing the departments whose American fields he intends to study is set up shortly after he registers. The chairman of the committee is from the department of the student's greatest interest and acts as his adviser. The committee also prepares and reads the student's comprehensive examination and reads the thesis if one is submitted.

The candidate for a degree must pass a final written examination testing his understanding of American Civilization in terms of his individual program of studies.

Master of Arts. With the approval of his advisers and committee, a candidate for the Master of Arts degree with a major in American Civilization may elect in lieu of the thesis six additional hours of course work, to include at least two substantial seminar papers. The total number of credit hours required for the degree would then be thirty semester hours.

Each candidate must present credits for at least fifteen semester hours of work in two of the four cooperating departments, and credits for at least fifteen semester hours in supporting courses (nine hours if a thesis is elected). Supporting courses will normally be in such fields as European or Latin-American history, English literature, comparative literature, philosophy, art, education, sociology, economics, and government and politics.

Each candidate must demonstrate in a written examination that he possesses a reading knowledge of one foreign language.

All other requirements are the same as for the degrees of Master of Arts and Master of Science in other fields.

Doctor of Philosophy. The American Civilization program cuts across several fields; therefore, a faculty committee representing the departments in which the student plans to study will be appointed shortly after the student registers. The chairman of the committee is from the department of the student's major interest and acts as his adviser. The committee is responsible for helping the student to integrate his program. Working through the student's adviser, the committee aids in planning the student's over-all program, prepares and grades any comprehensive examinations, and reads the dissertation.

The general requirements for the degree of Doctor of Philosophy in American Civilization are the same as those for the doctoral degree in other fields.

REQUIREMENTS FOR THE DEGREE OF MASTER OF EDUCATION

Thirty semester hours of course work are required, which may include courses in departments other than Education not to exceed one-half of the total thirty hours, such courses to be selected in conformity with the student's

special needs as agreed upon by the student and his adviser. Of the thirty hours, not less than one-half must be on the 200 level.

At least four of the thirty semester hours must be in seminar work or other 200 courses in connection with which two seminar papers will be prepared in specially prescribed form, approved in writing by the instructor in charge of the course work and the student's adviser, and filed in the College of Education. One of these papers shall deal with a topic in the student's major field of concentration. The other paper may be written in a 200 course outside of the field of education.

The requirements in regard to advancement to candidacy, transfer of credits, and final oral examination are the same as for the degrees of Master of Arts and Master of Science.

REQUIREMENTS FOR THE DEGREE OF MASTER OF BUSINESS ADMINISTRATION

The Master of Business Administration program is designed primarily to train students for positions of responsibility in business and government. The aim is to develop technical competence plus a thorough knowledge and appreciation of the art of management. The study of administrative policies and practices encourages interest and realistic thinking in management problems and responsibilities.

The program leading to the degree of Master of Business Administration includes advanced study of business organization and administration in the fields of accounting and statistics, finance, general business, industrial management, insurance and real estate, marketing, personnel relations, public utilities and transportation.

Admission. Admission to the Master of Business Administration program is limited to those students whose undergraduate records from accredited institutions demonstrate special abilities and promise of further development. Undergraduate records, participation in student activities, and business experience are carefully evaluated. Personal interviews are desirable.

Those students whose major undergraduate work has been in arts, agriculture, science, education, or engineering subjects are required to complete certain basic core course requirements in business and economics before undertaking specialized graduate work for the degree of Master of Business Administration. The core course requirements are listed below. Responsible experience of exceptional value and importance may be substituted for specific courses.

Principles of Economics.....6 hours	Marketing Principles3 hours
Principles of Accounting.....6 hours	Marketing Management3 hours
Business Law6 hours	Money and Banking.....3 hours
Labor Economics3 hours	Financial Management3 hours
Personnel Management3 hours	Statistics3 hours

Curriculum Requirements. Requirements for the Master of Business Administration degree include the completion of at least thirty hours of graduate credit in a program approved by the faculty adviser. The thirty-hour program includes 24 credit hours of course work and 6 credit hours for the thesis. At least 12 hours and not more than 16 hours of course work will be taken in the student's major field of concentration. Courses outside the major field should be related to the student's interest, and it is strongly urged that at least two credit courses in economic theory or analysis be included.

Twelve hours of the required twenty-four credit hours must be made up of courses numbered in the catalog as 200 courses, which are courses limited to graduate students.

Thesis. A thesis representing research in the major field of concentration and submitted in partial satisfaction of the requirements for the Master of Business Administration must be approved by the student's adviser and presented in its final form to the Dean of the Graduate School not later than the date specified in the calendar in the front of this catalog. The date published is the deadline for the acceptance of theses but they may be deposited earlier. Final approval of the thesis is given by the examination committee appointed by the Dean of the Graduate School. Detailed directions for the formal preparation of the thesis may be obtained from the Student's Supply Store.

Admission to Candidacy for the Master of Business Administration Degree. At the beginning of the semester in which the student plans to obtain the Master of Business Administration degree, he must make formal application to the Graduate Council for admission to candidacy for the degree. Such application must be endorsed by the student's faculty adviser, and by the head of the department in which he is studying.

The final requirement of the Master's program is the final examination, either written or oral as requested by the faculty adviser and the head of the department. The examination will cover three phases of the graduate work—the major field of specialization, the minor fields and defense of the thesis.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF EDUCATION

The Doctor of Education degree is offered for students who hold or expect to hold teaching or administrative positions in education and who desire to develop exceptional competence in special areas. The ability to explore and solve practical educational problems is emphasized. The requirements are the same as for the degree of Doctor of Philosophy except as specified below.

Foreign Languages. The requirement of foreign languages may be waived for candidates for this degree when the program of study and research does not involve the use of foreign languages but such action must be approved by the Graduate Council. The requirements are determined by the Department of Education.

Major and Minor Subjects. The candidate must select one major area and

one minor area in which he expects to develop exceptional competence. The minor may be a single area or may consist of a group of related areas selected to broaden the candidate's understanding of education. In addition to the major and minor, other areas if desired may be included in the program also. The amount of course work required in the major, minor, and related areas will vary according to the needs of each individual candidate.

Project. Instead of completing a thesis as required for a candidate for the degree of Doctor of Philosophy, a candidate for this degree must demonstrate exceptional competence to work through field problems by completing a project in the major area. A Committee on Doctoral Research is appointed for each candidate. The committee is composed of three members, at least two of whom are from the faculty of the College of Education. The committee passes upon the student's plans for research. The specialist in the student's major area serves as sponsor and provides detailed guidance for the project.

The regulations governing submission and form of copies of the project are the same as for the Doctor of Philosophy thesis.

Comprehensive Examination. A comprehensive examination, which will cover the general fields of major and minor study, must be passed before the candidate may take the final oral examination. The written part of the comprehensive examination is ordinarily 10 to 15 hours in length; in addition, there may also be an oral part to the examination.

Final Oral Examination: The final examination covers the project and its relationship to the general field in which it lies and the candidate's attainments in related areas.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Advancement to Candidacy. Candidates for the Doctor's degree must be admitted to candidacy at least one academic year before the final examination. Applications for admission to candidacy for the Doctor's degree are made in duplicate by the student and submitted to his major department for further action and transmission to the Dean of the Graduate School. Blanks may be obtained at the office of the Graduate School.

The applicant must have demonstrated to the head of the Foreign Language Department that he possesses a reading knowledge of French and German. With the approval of the major department and the Graduate Council, in special cases another Foreign language may be substituted for either French or German. Preliminary examinations or such other substantial tests as the departments may elect are also required for admission to candidacy.

Residence. The equivalent of three years of full-time graduate study and research is the minimum required. Of the three years the equivalent of at least one year must be spent in residence at the University. On a part-time basis the time needed will be correspondingly increased. All work at other institutions

offered in partial fulfillment of the requirements for the Doctor of Philosophy degree is submitted to the Graduate Council for approval, upon recommendation of the department concerned, when the student applies for admission to candidacy for the degree.

The Doctor's degree is not given merely as a certificate of residence and work, but is granted only upon sufficient evidence of high attainments in scholarship, and ability to carry on independent research in the special field in which the major work is done.

Major and Minor Subjects. The candidate must select a major and one or two closely related minor subjects. At least twenty-four semester hours, exclusive of research, are required in minor work. The remainder of the required residence is devoted to intensive study and research in the major field. The amount of required course work in the major subject will vary with the department and the individual candidate. The candidate must register for a minimum of twelve semester hours of research.

Thesis. The ability to do independent research must be shown by a dissertation on some topic connected with the major subject. An original type-written copy and two clear, plain carbon copies of the thesis, together with an abstract of the contents, 250 to 500 words in length, must be deposited in the office of the Dean not later than the date specified in the calendar in the front of this catalog. The date published is the deadline for the acceptance of theses but they may be deposited earlier. It is the responsibility of the student also to provide copies of the thesis for the use of the members of the examining committee prior to the date of the final examination.

The original copy should not be bound by the student, as the University later binds uniformly all theses for the general University library. The carbon copies are bound by the student in cardboard covers which may be obtained at the Students' Supply Store. The abstracts are published biennially by the University in a special bulletin.

A manual giving full directions for the physical make-up of the thesis is in the hands of each professor who directs thesis work, and should be consulted by the student before typing of the thesis is begun. Students may obtain copies of this manual at the Students' Supply Store.

Final Examination. The final oral examination is held before a committee appointed by the Dean. One member of this committee is a representative of the graduate faculty who is not directly concerned with the student's graduate work. One or more members of the committee may be persons from other institutions who are distinguished scholars in the student's major field.

The duration of the examination is approximately three hours, and covers the research work of the candidate as embodied in his thesis, and his attainments in the fields of his major and minor subjects. The other detailed procedures are the same as those stated for the Master's examination.

RULES GOVERNING LANGUAGE EXAMINATIONS FOR CANDIDATES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

1. A candidate for the Doctor's degree must show in a written examination that he possesses a reading knowledge of French and German. With the approval of the major department and the Graduate Council, in special cases another foreign language may be substituted for either French or German. The passages to be translated will be taken from books and articles in his specialized field. Some 300 pages of text from which the applicant wishes to have his examination chosen should be submitted to the head of the Department of Foreign Languages at least two weeks before the examination. The examination aims to test ability to use the foreign language for research purposes. It is presumed that the candidate will know sufficient grammar to distinguish inflectional forms and that he will be able to translate readily in two hours about 500 words of text, with the aid of a dictionary.

2. After the book has been approved it must be deposited in the office of the Department of Foreign Languages at least three days in advance of the test.

3. Examinations are held at the office of the Department of Foreign Languages, on the first Tuesday of October, February and June, at 2 P. M.

GRADUATE FEES

The fees paid by graduate students are as follows:

Matriculation fee of \$10.00. This is paid once only, upon first registration in the Graduate School.

Diploma fee for Master's degree, \$10.00.

Graduation fee for Doctor's degree including a hood, \$35.00.

College Park:

A fixed charge, each semester, of \$10.00 per semester credit hour for students carrying ten hours or less; for students carrying more than ten hours, \$100.00 for the semester.

Laboratory fees, where charged, range from \$1.00 to \$20.00 per course per semester.

There is a \$3.00 fine for violation of the University parking regulations. All graduate students are expected to abide by these regulations, regardless of full-time or part-time attendance.

Baltimore:

The fees for graduate work at the professional schools in Baltimore are determined by the individual school concerned. Students should consult the catalog of the respective school in which they intend to pursue their work.

Living Expenses and Self-Help:

The University in no way assumes responsibility for the housing or medical care of graduate students.

Board and lodging are available in many private homes in College Park and vicinity. The cost of board and room varies from about \$60.00 to \$75.00 a month, depending upon the desires of the individual. A list of accommodations is maintained by the housing bureau in the office of the Dean of Men.

Application for student employment, aside from fellowships and assistantships, may be made through the offices of the Dean of Men and the Dean of Women, or to department heads.

FELLOWSHIPS AND ASSISTANTSHIPS

Fellowships. A number of fellowships have been established by the University. The stipend for the University fellows is \$675 for nine months and the remission of all graduate fees except the diploma fee. Several industrial and special fellowships, with varying stipends, are also available in certain departments.

University Fellows are permitted to carry a full graduate program, and they may satisfy the residence requirement for higher degrees in the normal time.

Applications for fellowships are made on blanks which may be obtained from the office of the Graduate School. The application, with the necessary credentials, is sent by the applicant directly to the Dean of the Graduate School. Applications which are approved by the Dean are forwarded to the departments, where final selection of the fellows is made. The awards of University fellowships are on a competitive basis.

Graduate Assistantships. A number of teaching and research assistantships are available in several departments. The compensation is \$120.00 per month unless otherwise specified and varies with the nature and amount of service required and with the terms of appointment. The amount of credit allowed toward a degree is normally ten credit hours. The research assistants, especially those in the Experiment Station, usually participate in research that meets the requirements for a Master's or a Doctor's degree.

Applications for graduate assistantships are made directly to the departments concerned and appointments are made through the regular channels for staff appointments. Further information regarding these assistantships may be obtained from the department or college concerned.

COMMENCEMENT

Attendance is required at the June commencement if the degree is conferred at that time.

Application for diploma must be filed in the office of the Registrar eight weeks before the date at which the candidate expects to obtain a degree except during the summer season.

Academic costume is required of all candidates at the June commencement. Those who so desire may purchase or rent caps and gowns at the Students' Supply Store. Orders must be filed eight weeks before the date of convocation

but may be cancelled later if the student finds himself unable to complete his work for the degree.

AERONAUTICAL ENGINEERING

Professor Sherwood; Associate Professors Corning, Shen, Rivello; Assistant Professor Guess; Instructor Hertler.

The Department of Aeronautical Engineering offers courses and opportunities for research leading to the degree of Master of Science in Aeronautical Engineering.

The candidates may elect off-campus subjects given under the Graduate School of the University of Maryland, but must receive a minimum of 6 semester hours of graduate instruction under this department at College Park and pass with a grade of B or higher. An acceptable thesis written under the guidance of the faculty is required.

Facilities for graduate research include a complete subsonic laboratory consisting of a 7.75 x 11 ft. wind tunnel and related shops, offices and photographic equipment. For high speed research, a 6" x 6" supersonic wind tunnel is available with Schlieren optical system, instantaneous strain-gauge type pressure pick-ups, remote angle of attack control and other accessories. A 100 h. p. rotary vacuum pump provides adequate pumping capacity for 10 second runs at 2 minute intervals.

The general aerodynamics laboratory is equipped with the following major items: a two foot subsonic wind tunnel, a ballistics range for measuring supersonic drag of projectile-shaped bodies, a water table for simulating compressible flow by hydraulic analogy, a large electrolytic tank for the solution of potential flow problems, manometer boards, and high speed flash photographic equipment.

The structures laboratory has a 400,000 pound capacity universal testing machine, hydraulic tension-compression jacks and pumps, and lead shot bags for applying structural loading. Traction dynamometers and SR-4 tension-compression load cells are available to measure loads. The laboratory has SR-4 strain indication equipment, extensometers, compressometers, Huggenberger extensometers, and a recording oscillograph for measuring strain. Dial gages and a transit are available for measuring deflections.

AGRICULTURAL EDUCATION AND RURAL LIFE

Professors Ahalt, Cotterman; Associate Professor Murray.

This department offers work leading to the degree of Master of Science. Students may work full-time towards a degree or they may complete the requirements on a part-time basis, taking the special three-week courses offered for agriculture teachers in summer, regular six-week summer school courses, and courses offered in the evenings and on Saturday during the school year.

Some students profitably elect special problems courses, mostly in agriculture, in which they work on problems in their local school and community. All students are required to enroll in a minimum of four of the three-week summer sessions for agriculture teachers or the equivalent in course work on the campus at College Park.

AMERICAN CIVILIZATION

Professor Bode and cooperating specialists.

The American Civilization program offers work leading to both the degrees of Master of Arts and Doctor of Philosophy. The departments of English, History, Government and Politics, and Sociology join to offer integrated plans

of study. In his class work the student will emphasize the offerings of any one of these departments. For lists of courses from which his particular program is to be developed, he is to see principally the listings of the four departments just mentioned. His adviser will be the chairman of the department whose work the student plans to emphasize, or if not the chairman then someone appointed by him.

Amer. Civ. 137, 138. Conference Course in American Civilization (3, 3). First and second semesters. Four American classics, drawn from the fields of the cooperating departments, are studied in detail each semester. Specialists from the appropriate departments lecture on these books. The classics for this year are: Franklin's *Autobiography*, De Tocqueville's *Democracy in America*, Schelesinger's *The Age of Jackson*, and Thoreau's *Walden*, for the first semester; and for the second semester, Twain's *The Adventures of Huckleberry Finn*, Howell's *The Rise of Silas Lapham*, the Lynd's *Middletown*, and Myrdal's *An American Dilemma*.

The Conference Course, or either semester of it, may be chosen by a student outside the program as an elective. It also counts as major credit for the four cooperating departments. The course meets like a seminar, once a week.

BOTANY

Professors Bamford, Jeffers, Gauch, Cox, Weaver, Appleman (emeritus), Norton (emeritus); Associate Professors Brown, D. T. Morgan; Assistant Professors O. D. Morgan, Dugger, Rappleye, Keller; Research Associate Krauss; Research Assistant Sisler.

The Department of Botany offers a graduate course of study leading to the degree of Master of Science and to the degree of Doctor of Philosophy. The student may pursue major work in any one of the three main divisions of the department, namely: Plant Physiology, Plant Pathology, or Plant Morphology, Cytology and Cytogenetics. Since a thesis based on original research is required for each degree, a qualified student may be allowed to pursue a problem of his own choosing, but it is more probable that the subject of his research will be that already in progress since the department is devoted to a study of basic agricultural problems as well as projects of a more fundamental nature.

An individual employed at a nearby institution may submit a thesis on his research work at the institution under the direction of, and approved by, a member of the faculty. Laboratory facilities are available for research in each division, and there are ample greenhouses and plot space available on the campus or adjacent University farm land.

In addition to the normal requirements of the Graduate School, one must possess a reading knowledge of either French or German, before the Master of Science degree is granted.

EDUCATION

Professors Brechbill, Brown, Cotterman, Devilbiss, Hornbake, McNaughton, Mershon, Mohr, Morgan, Newell, Prescott, Schindler, Van Zwoll, Wiggin; Associate Professors Bryan, Byrne, Hovet, Kurtz, Maley, Patrick, Perkins, Woods; Assistant Professors Beatty, Greene, Gordon, Spencer, Thompson, Waetjen; Instructors Denecke, Kemble, Schneider and Tierney.

The Department of Education offers Graduate School programs leading toward the Master of Arts, Master of Education, Doctor of Philosophy, and Doctor of Education degrees.

MASTER OF ARTS AND MASTER OF EDUCATION

A student in Education has the option of qualifying for the degrees of Master of Arts or for the degree of Master of Education.

In addition to the general requirements for admission to the Graduate

School, applicants for unconditional admission with a major in Education must have had sixteen semester hours of undergraduate work in Education of acceptable quality, equivalent in character to the work in the junior and senior years of the University of Maryland. The Education Committee on Masters' Programs may interpret this requirement so that foundation work in fields other than education may be accepted in cases of graduate students not preparing for school work.

The time limit for completing either degree is the same as that prescribed for the Master of Arts and the Master of Science degrees of the Graduate School.

A qualifying written examination is required of all candidates for a degree, to be taken after the student has successfully completed at least 12 semester hours of satisfactory graduate work. This examination covers the student's major area of work for the degree. Following is a list of the areas in which this examination may be taken:

Adult Education	Higher Education
Business Education	History and Philosophy of Education
Comparative Education	Home Economics Education
Educational Administration and Supervision	Secondary School Curriculum and Instruction
Elementary School Curriculum and Instruction	Human Growth and Development
Guidance and Personnel	Industrial Arts Education
Health, Physical Education, and Recreation	Nursing Education
	Vocational Industrial Education

To assist in the choice of reading in preparation for the examination, reading lists in the several areas are available from the professor in charge of the area. No student is recommended to the Graduate Council for advancement to candidacy until he has successfully passed the qualifying examination. Currently the examination is administered on the third Saturday of January and May and on the Saturday preceding the last week of the Summer Session at College Park only. A student failing the examination may repeat it. However, a student is not allowed to take the examination more than three times.

Candidates for masters' degrees in Education who are high school teachers not preparing for administrative positions are advised to take at least 12 semester hours in their subject fields. Students who desire to qualify for a secondary school principalship in Maryland should take approximately one third of their Master's program in areas other than Education.

DOCTOR OF PHILOSOPHY AND DOCTOR OF EDUCATION

Each candidate is required to achieve exceptional ability in at least one major area and one minor area of competence. The minor may consist of a single area or of a group of related courses. Areas related to the major and minor may be included also if desired. The choice of specific areas is optional with the student and his faculty adviser.

The candidate should choose his major from the following list of areas:

Curriculum and Instruction	History, Philosophy, and Comparative Education
Educational Administration and Supervision	Human Development Education
Elementary Education	Industrial Arts Education
Guidance	Secondary Education
Physical Education, Recreation, and Health	Vocational-Industrial Education

Minors may be chosen from fields other than Education as approved by the Committee on Candidacy, from the foregoing list of major areas, or from the following list:

Adult Education	Higher Education
*Agricultural Education	Home Economics Education
Business Education	

In addition to the general University requirements for a Doctor's degree, the following requirements must be met:

1. The preliminary examination for admission to candidacy for the Doctor's degree will cover the student's preparation in major and minor fields, and will include such other examinations as may be required by the faculty. A student must be admitted to candidacy in order to have the department's official permission to be a candidate for a Doctor's degree.

2. A comprehensive examination covering the general fields of major and minor study must be passed by each candidate, after which the final examination is administered by a committee appointed by the Dean of the Graduate School.

3. In order to meet the residence requirements, a candidate for the Ph.D. degree must spend at least two semesters in full-time study on the College Park campus.

In general the requirements for the Doctor of Education degree are the same as those for the degree Doctor of Philosophy. The most important differences between the two degrees are as follows:

1. The purpose of the Doctor of Education degree is to prepare persons of exceptional competence to work in the field. The emphasis for this degree is placed on broad understanding, whereas that for the degree of Doctor of Philosophy is placed on specialized research.

2. A reading knowledge of foreign languages is required for the degree of Doctor of Education only when needed for research and study in the doctoral program.

3. In meeting residence requirements, a candidate for the Ed.D. degree may substitute two summers of residence for one semester of residence, or four summers for two semesters.

4. The doctoral study for the Ed.D. consists of a project rather than a dissertation. The project requires research to meet a practical field problem. Credit of six to nine hours is allowed for a project as compared with twelve to eighteen hours for a Ph.D. dissertation.

*Administered under a separate department of the Graduate School.

GEOGRAPHY

Professors Van Royen, Hu; Consulting Professors Roterus, Whipple; Lecturers with rank of Professor Lemons, McBryde; Associate Professor Patton; Assistant Professors Augelli, Herbst, Karinen; Instructors Firman, Simonett; Research Associate Battersby; Research Assistants Chang, Kelley; Lecturers (off campus courses) Ahlmann, Anderson, Brierly, Davies, Dooley, Fernstrom, Held, Kyle, Miles, Totten, Roscoe.

Students seeking graduate degrees in geography are expected to have acquired a broad foundation in the subject and in allied fields. This foundation must have included a minimum of 24 semester hours in geography, of which 6 semester hours shall have been in Morphology and Map Reading and Interpretation, 6 semester hours in Weather and Climate, and 12 semester hours in Human, Economic, or Regional Geography. In addition the student must have taken successfully the following courses, or their equivalents, in allied fields: American Government (3 semester hours), Anthropology (3 semester hours), Economics (6 semester hours), History (6 semester hours), Introductory or General Botany (3 semester hours), Sociology (3 semester hours), English Composition and Literature (12 semester hours), Foreign Language (12 semester hours). Students who do not have this background will be accepted as graduate students on a provisional status only and will be required to make up their deficiencies before being admitted to candidacy for an advanced degree. Graduate credit will not be given for courses taken to make up for deficiencies in background.

In addition to meeting the general requirements of the Graduate School, candidates for the Master's degree in geography are required to have taken successfully: one field course (Geography 200, or equivalent), a course in General Cartography and Graphics (Geography 154 and 155, or equivalent), at least one course in Soils, and one seminar. In addition to the final oral examination, the candidate for the Master's degree in geography is required to pass satisfactorily a written examination covering the fields in which he has worked, his understanding of basic principles, and his power of reasoning.

A graduate student seeking the Doctor of Philosophy degree in geography must take a comprehensive written and oral examination to determine whether he has sufficiently broad and profound knowledge and understanding of the entire field of geography to qualify as a candidate for the Doctor's degree. He will be examined in the systematic aspects of the field (Geomorphology, Climatology, Plant Geography, Soils and Soil Geography, Cartography, Social and Economic Geography, and History, Methodology and Philosophy of Geography), and in two or three regional fields. Normally, before taking the examination, the student should have taken one or more courses under each of the senior members of the staff, and seminars under at least two of them.

The Colloquium meets weekly for reports on the research of the faculty and graduate students, and for expository lectures on papers published in current mathematical journals.

In addition to satisfying the Graduate School requirements, a student, before being recommended for admission to candidacy for the degree of Master of Arts with a major in mathematics, must demonstrate a reading knowledge of one foreign language of scientific importance and must pass an oral preliminary examination covering undergraduate and graduate work in both major and minor fields of study.

A student preparing for the degree of Doctor of Philosophy with a major in mathematics will be offered a choice of two curricula, one with an emphasis on pure mathematics, the other with an emphasis on applied mathematics.

Before presenting himself for the preliminary examination for the doctorate, a student is expected to have acquired a background of mathematical knowledge equivalent to the following group of graduate studies. In the pure mathematics curriculum: Algebra, six hours; Analysis, twelve hours; Geometry and Topology, six hours; Mathematical Methods or Mathematical Physics or Physics or (further) Analysis, six hours. In the applied mathematics curriculum: Analysis, eighteen hours (including Math. 211, 214, 217); Mathematical Methods, six hours; Mathematical Physics, six hours (including Math. 260); Algebra or Geometry or Topology as related to the student's individual work.

A student who intends to present a minor in mathematics of nine credit hours for the degree of Doctor of Philosophy must include at least three credit hours of 200 courses in mathematics. If the program includes 12 credit hours or more, at least six credit hours must be in 200 courses in mathematics.

PHYSICS

Professors Morgan, Myers, Toll; Part-time Professors Brickwedde, de Launay, Kennard, Wangsness; Associate Professors Iskraut, Singer; Assistant Professors R. Anderson, Ferrell, Grant, Krumbein; Research Associates J. Anderson, Green, Visscher; Part-time Lecturers Betchov, Bleil, Branscomb, Greenspan, Herzfeld, McFadden, Mann, Marton, Montroll, Morowitz, Pai, Parker, Resler, Reed, Saenz, Seigel, Smart, Snavely, Steele, Wada, Witten.

It is expected that the following courses should have been taken preliminary to graduate work. Any deficiencies should be made up at once. A limited amount of graduate credit will be allowed for courses so taken.

General Physics

Heat

Intermediate Mechanics

Optics

Electricity and Magnetism

Modern Physics

Differential and Integral Calculus

Candidates for both the Master's and Doctor's degree are required to take Introduction to Theoretical Physics, (Physics 200). The course runs for a full year and carries 10 semester hours credit. The minimum prerequisites in mathematics are differential and integral calculus, but advanced calculus and differential equations are recommended.

Candidates for the Doctor's degree should follow the Introduction to Theoretical Physics with Quantum Mechanics. No other courses are specifically required. It is recommended in the selection of further courses that the student avoid overspecialization in any field. In particular he should take a wide variety of classical courses as well as courses in selected fields of Modern Physics.

Candidates for advanced degrees in Physics may have a minor in either chemistry, mathematics, engineering, applied physics, or a satisfactory combination of two or more of the group.

Thesis (Ph.D.): The student must outline his topic to the graduate staff for approval. This outline must clearly set forth the nature of the problem, proposed method of procedure and the possible results that may be obtained. The completed thesis will also be presented to the graduate staff for approval.

Off-Campus Courses: The Physics Department offers courses at convenient times and places so as to accommodate the greatest number of students. In order to facilitate graduate study and supervision of research in the Washington area, the Department has part-time professors in certain government laboratories where a large number of students are interested in graduate study and where there are facilities for research. At government agencies where there is no part-time professor, employees desiring to do graduate work in physics should contact a member of the graduate staff in the Physics Department.

ZOOLOGY

Professors Wharton, Phillips, Burhoe; Lecturers Baker, Camin, King and Reynolds; Associate Professors Littleford, Anastos; Assistant Professor Brown; Instructors Allen and Grollman; Junior Instructors Gorirossi and Pierson.

The Department of Zoology offers work leading to the Master of Science and the Doctor of Philosophy degrees. The general academic requirements which must be fulfilled for these degrees are described earlier in the catalog.

The special fields which graduate students may emphasize in working toward these degrees are cytology, embryology, fisheries biology, genetics, parasitology, physiology and systematics. In some fields opportunities for training and summer employment in nearby research laboratories are available to qualified students and under certain circumstances graduate students may work, under supervision, with the unrivaled collections of the U. S. National Museum of the Smithsonian Institution, in Washington, D. C. Information concerning the specific requirements in each of these fields may be obtained from the department.
